

The NeverNight Harness is designed for true 'plug and play' installation. There is no need to remove or modify your present wiring in any way. To install, follow these easy steps:

1. Unplug the stock wiring connectors from your headlamps and let them dangle for now. Remove the left and right front grills if necessary.
2. Insert the Lamp Sub-Harnesses as shown but don't connect them to the lamps as of yet. Fig 1
3. Position the Main Lamp Harness as shown and connect the left & right Lamp Sub-Harnesses to the Main Lamp Harness. Fig 2

4. Place the Main Lamp Harness under the stock harness as shown and secure in place. Note that the Sub Harnesses and their respective connectors have been located forward. Now, connect the headlamp connectors to the bulbs. These connectors are tight and will require some force to install. Fig 3
5. Remove the inner mounting bolt on each headlamp bucket assembly. Place the relay mounting brackets, located on the Main Lamp Harness, as shown and secure using the original bolts. Fig 4

6. Ground the harness by installing the ground terminal at the horn mounting bolt. Fig 5

7. Route the Main Lamp Harness through the opening at the radiator support and position the red power connector as shown. Fig 6

8. Connect the Male H4 connector on the Main Lamp Harness to the lamp connector on your stock harness that used to be plugged into the Driver's side Low Beam bulb. The other three stock lamp connectors, and their wires, can now be tied up out of the way.

9. Remove any wires that are presently attached to the positive output of your alternator and attach the Main Alternator Harness to the Alternator as shown. Fig 7

10. Connect any wires that were previously unattached at the Alternator to the stud on the Main Alternator Harness.

11. Route the harness as shown in fig 6 and connect the red power connector on the Alternator Main Harness to the mating connector on the Main Lamp Harness.

12. That's it!!!

WARRANTY DISCLAIMER

Seller disclaims any express or implied warranty of merchantability with respect to the goods sold. Seller disclaims any warranty of fitness for any particular purposes whatsoever with respect to the goods being sold.

Seller disclaims all liability for any personal injury or damage which may result from the sale, installation, or use of any product sold. Labor charges, and/or damage incurred in installation, repair or replacement as well as incidental and consequential damages connected therewith are excluded and will not be paid by seller. The installation of this product may adversely affect a manufacturer's warranty with respect to certain vehicles and/or manufactured goods. Improper installation, modification and/or abuse voids any warranty.

This warranty is the only express warranty made by seller. Seller will repair or replace any product which proves to be defective in material and/or workmanship under normal installation, use and service. This disclaimer is limited only by applicable state laws.

NeverNight™ INSTALLATION INSTRUCTIONS - 1968-1982 Corvette

Note: If you have purchased new Xenon headlights to compliment your NeverNight harness, you will need to modify your headlight buckets as shown in the photos. To do this remove the headlight bucket and slowly/carefully start removing material to allow the headlamp to recess into the bucket. Be careful not to remove too much material, only what is necessary.

PRODUCT EVALUATION SHEET

Telling us what you like and don't like determines what we make and how we make it. We would appreciate it if you would take just a few minutes of your time to answer the following questions about the parts you ordered from us. Simply fold this form on the dotted lines, seal with tape and mail it to us. Do not use staples and make sure our address faces out. SpeedDirect will not disclose the information it collects to outside parties. SpeedDirect does not sell, trade or rent your personal information to others. Your privacy is important to us.

1) Kit: NeverNight

2) Where did you learn about this kit?
